

ARGO CARTON SEALER

ARGO CARTON SEALER

METHOD OF OPERATION

1. Operator folds the minor flaps and the inner major flap on both sides and places loaded carton into the machine
2. Once operator removes hands and a box is detected the machine will begin its cycle
3. A cylinder will advance the box forward where a hot melt glue system will apply glue to the folded flaps
4. The outer major flaps are then closed and box rides into a short compression area
5. Completed cartons are discharged out the backside of the machine

SPECIFICATIONS

Features

- Hot Melt Glue Tank
- Safety Light Curtain
- Quick Changeover
- Minimal Change Parts
- Compact Footprint
- Reduced Carton Size Range

Packing Materials

- Paperboard
- Corrugate

Speed

- Up to 20 Cartons per minute

Size Range

- Min: .75" x .75" x 1.25"
- Max: 4.5" x 2" x 6"

*Can be ordered outside the standard size range

Voltage & Controls

- 220 Volts 50/60 Hz, Single Phase

Air Consumption

- 60 PSI (4 bar)

Shipping

- Less than 360 lbs

*All Engineering Specifications and Designs are subject to change based on individual requirements
